

ToDo APP

This Is Simple Spring MVC Todo App, Where Data Is Stored In Temporary Variable.

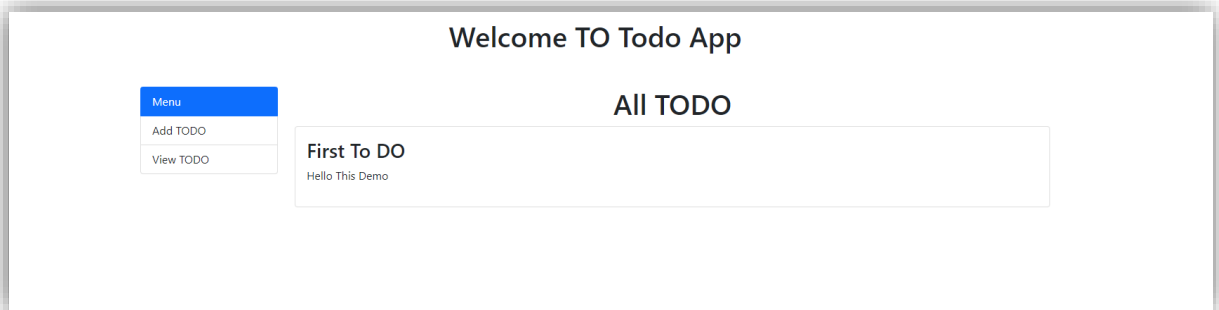

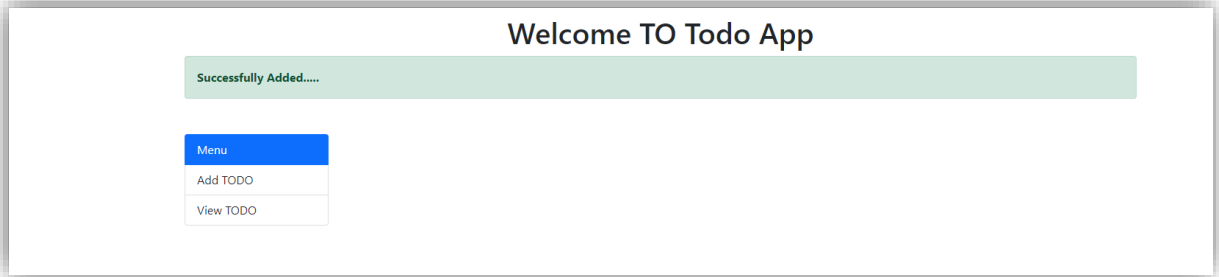

I Used Bootstrap4 , Jstl, Jsp.

The request processing workflow in Spring Web MVC

Here Are Some ScreenShots

The screenshot shows a web application interface with the title "Welcome TO Todo App". On the left, there is a "Menu" sidebar with two options: "Add TODO" (highlighted in blue) and "View TODO". The main content area is titled "Add TODO" and contains two input fields: "Enter Your Todo Title" and "Enter Your Todo Content". Below these fields is a button labeled "Add Todo".
